

R Version

R 3.6 is run on the platform. So we encourage you to maintain this version.

However, if the AI market task is functioning on the platform, then everything is fine.

Supported packages

Below is a list of packages installed on the platform. If you have any packages that you wish to use but is not currently included, please visit bit.ly/PackageRequest2019 and fill out the relevant form.

NOTE: We do not have the capacity to install packages that are not on the official CRAN repository.
